WORK EXPERIENCE

Space Informatica

Jun 2021 – Jan 2022

Backend developer Intern

Milan

- Developed and maintained **REST APIs** for the Bticino backend application, working with backend services, data processing, and API integration.
- Contributed to **full-stack development tasks**, implementing frontend features and integrations using **Angular** alongside backend services.
- Worked on the Hetzner office booking application with **Spring Boot**, contributing to the development of functionality for managing and booking office workspaces and slots.
- Collaborated with the development team to **debug, test, and maintain application features**, gaining hands-on experience across backend and frontend development.

WeRoad

Sep 2023 – Sep 2025

Frontend Software engineer

Milan

- Developed and maintained production-grade user-facing features using **Nuxt 2, Nuxt Bridge, and Nuxt 3**, contributing to the migration of a large-scale codebase to the latest framework architecture.
- Built reusable, responsive UI components and composables with **Vue.js, TypeScript, and Tailwind CSS**, improving consistency, maintainability, and development efficiency.
- Improved **SEO and page performance** through Nuxt SSR, metadata optimization, and semantic HTML, while strengthening application reliability through **unit and integration testing**.

EDUCATION

ITS Talent Tech Factory

May 2023
